

Contents

Identifiability of Infinite Mixtures of Distributions M. Nikfar	329
A Large Sample Approximation of the O-BLUE of a Location Parameter S. Mandal and M. Samanta	343
Quadrat Versus Distance Methods for Complete Spatial Randomness Tests R. Pourtaheri, M. Q. Vahidi-Asl and M. Mohammadzadeh	351
Bayesian analysis of association (BANOAS) in contingency tables with ordinal and interval variables S.K.Ghoreishi and M.R.Meshkani	363
Random Walks on Finite Graphs Mokhtar H. Konsowa	373
Bayesian Sample Size Calculations Involving the Reliability Coefficient of a scale in Social Sciences Aristea Limakopoulou and Athanassios Katsis	381
Some Characterization Results Based on the Conditional Expectation of Truncated Order Statistics (Record values) Ramesh C.Gupta and Mohammad Ahsanullah	391
A new construction method for two level $E(s^2)$ -optimal supersaturated designs S. Georgiou, C. Koukouvinos and P. Mantas	403
Bayesian Modeling of Recurrent Events Data with an Additive Gamma Frailty Distribution and a Homogeneous Poisson Process Vera Lucia Damasceno Tomazella, Francisco Louzada-Neto and Giovanni Loiola da Silva	417
