

Contents

Certain Characterizations of the Power Function and Beta Distributions Based on Order Statistics M. Ahsanullah and G.G. Hamedani	220
Comparison of the Performance of Basu's Estimator with Some Well Known Sampling Schemes and Estimators of Population Total Muhammad Hanif, M. Samiudddin and Muhammad Qaiser Shahbaz	226
Six Sigma Applications of Unbiased Versus Size-Biased Modified Power Series Distributions in Epileptic Samples Anwar Hassan, Peer Bilal Ahmad and Ramalingam Shanmugam	236
Use of Instrumental Variables in Non-Nested EV_Models Mahmood A. Bodla and M. Ishaq Bhatti	254
Characterizations of distributions by equalities of order statistics V.B. Nevzorov, V.K. Sagatelman	264
Testing for Outliers in the Factor Analysis Model Madhusudan Bhandary	272
Estimation of Experimental Error Variance in Saturated Factorial Designs A. A. Al-Shiha	284
Construction of Bounds in Prototype Testing A.D. Dharmadhikari, S.V. Sabnis and B.K. Sinha	302
Construction of Skew-Normal Random Variables: Are They Linear Combinations of Normal and Half-Normal? Mohsen Pourahmadi	314
Recurrence Relations for Moments of k-th Record Values from a Generalized Weibull Model M. Maswadah	330
