

Contents

Unimodality of Two Distributions Related to the Negative Binomial Distribution S. Gerhold	1
On the Bayesian Change-Point Problem in Regression Analysis G. Gholami Z.	9
Sub-Independence of Stable Random Variables A. Mohammadpour	29
On The Exponentiated Class of Distribution Essam K. AL-Hussaini	41
Characterizations of Minimum chi-square Divergence Binary Mixtures of Exponential Distributions M. Atallah, S. Elgayar	65
Comparison of Some Test Statistics for Testing the Mean of a Right Skewed Distribution S. Banik and B.M. Golam Kibria	77
Estimation of Stigmatized Characteristics of a Hidden Gang in a Finite Population: a Ranked Set Sampling Approach C. N. Bouza	91
Inferences for Exponentiated Gamma Distribution Based on Record Values A. I. Shawky and R. A. Bakoban	103
Some Characterizations of Distributions for Repair Time (past lifetime) in the Context of Size/Length-Biased Models S.S.Maya and S.M.Sunoj	125
