

Contents

Applying Multiple Imputation Using a Posterior Predictive Distribution for Models with Missing Continuous Covariates M. Ganjali and H. Zahed	477
Bayesian Test Plan For Steady State Availability of Series System M. A. Khan and H.M. Islam	493
Construction and Selection of Repetitive Group Sampling Plan Indexed Through Convex Combination of AOQL and MAAOQ R.Radhakrishnan and M.Mallika	499
A Comparison of Bootstrap Methods for Variance Estimation S. Amiri, D. V. Rosen and S. Zwanzig	507
Prediction Intervals for Exponentiated Family of Distributions Based on Record Values A. Asgharzadeh, and R. Valiollahi	529
Semi-Parametric Estimation of Survival Function Y. Zhang, J. Singh and J. Ding	549
Bayesian Analysis of Categorical Time Series and Its Application in Prediction of Tehran Air Quality H. Hassani, and M. R. Meshkani	557
Statistical Inference for Lorenz Curves in case of Two Dependent Samples S. Arora, K. K. Mahajan, and Pooja Bansal	579
Bayesian Analysis of the Glenn-David Model for Paired Comparisons M. Aslam and A.Urooj	595
On Dependence Functions of Copulas of Gumbel's Bivariate Extreme Value and Exponential Distributions M. Ahsanullah and M. Ishaq Bhatti	615
