Contents

Theory for the Simplest Case of ICA
L. T. Kien 539

Comparison of Wald, Score, and Likelihood Ratio Tests for Response Adaptive Designs
Y. Yi and X. Wang 553

On Some Properties of Stochastic Conditional Duration Models
A. Thavaneswarana and M. Ghahramani 571

Characterizations of Weibull Geometric Distribution
G. G. Hamedani and M. Ahsanullah 581

Bayesian Estimation Based on Dual Generalized Order Statistics from the Exponentiated Weibull Model
Z. F. Jaheen and M. M. Al Harbi 591

A New Test of Fit for the Structural Form of a Distribution Based on the Empirical Characteristic Function
M. Towhidi and M. Salmanpour 603

Classical Estimation of Mixed Rayleigh Distribution in Type I Progressive Censored
W. M. Afify 619

Bayesian Evaluation of Biomarkers as Surrogate Endpoints and its Application in Long-Term Effects of Skin Lesions Due to Mustard Gas

Separate Ratio-Product Estimator for Estimating Population Mean Using Auxiliary Information
G. K. Vishwakarma and H. P. Singh 653
