Health

Actuarial Program

Distinction, Development, Achievement

“Assurant Health’s Actuarial Internship Program helped me develop my industry knowledge and skill sets. The relaxed atmosphere and friendly employees helped me feel like a part of the team. The program even integrated social activities that included a Brewers’ game and a picnic where the interns got acquainted with one another. For me, the gratifying part was that I was not only able to develop an excellent knowledge and skill base, but also developed several friendships with people from across the country.”

Eric Wunder, Actuarial Intern 2007

Why Assurant Health?

Assurant Health has been in business for over 115 years. We currently provide health insurance coverage for nearly one million people nationwide. Our primary products include individual medical, small group, short term and student insurance products.

Assurant Health has an established tradition of encouraging employees to focus on individual professional development. In fact, our fundamental belief is that when people have the opportunity to grow, we all benefit—the employee, our business and our customers.

“A long time ago, when I was taking actuarial exams, I thought that I would be really smart when I earned my FSA. When I became an FSA, I realized that

I had only learned how to learn. I discovered that becoming smart and successful depended upon being with the right company—a company where I could learn from smarter people and have challenging assignments. That’s what we have here at Assurant Health for our actuaries.”

Don Hamm, President and CEO
